EDWARD JOCKERS

OBJECTIVE

I would like to work at a computer store, and further develop my skills and learn about related jobs. I want to get my associates degree and transfer to get my bachelors as computers are my passion.

SKILLS & ABILITIES

I am experienced with the hardware aspects of computers and am knowledgeable with computer parts. I built my own computer when I was 15 and have built several more computers for myself and others since then. I understand system specifications and their relative relation to performance. I also know basic diagnosing and how to switch CPUs, RAM, SSDs/hdds,gpus, motherboards, power supplies etc.

I also have customer service experience and have no difficulties with communication

EXPERIENCE

SUMMER CAMP COUNSLER, BALDWIN

June 2021-August 2021

It was my responsibility as well as the other counselors to take care of the camp kids. I worked full time and was required to mark down attendance of the kids, routinely check the roster, and deal with parents,

STOP&SHOP, BALDWIN

October 2021-September 2022

It was my job to handle the deli customers at the stop and shop. I am used to working in fast paced environments because of my experiences with the rush hours. I would take orders from many customers a day and complete the order to their liking. I worked the opening shifts; midday shifts and the closing shifts.

For unofficial experience I would often go after school with my electrical engineering teacher and would help him set up different projects that we would do for his electrical engineering class. I would set up raspberry pi 3s for him and new circuit projects with him. I credit him with helping me decide on IT as a major and he has given me invaluable advice and knowledge.

EDUCATION

Graduated at Freeport High school in 2021, currently at NCC for an IT associate with plans to transfer afterwards.
